

Test Case Sprint 3: Use Case 3

Group members	Eric Keeton
	Aqib Akhtar
	Wilber Castillo
	Zach Sugarman
	Jorge Castillo Guerra
	Darell Limtsen

Test Case ID	TC_1
Test Scenario	User Inputs a List of Drugs and saves that list to local memory
Preconditions	The user must have accepted the disclaimer allowing access to the application. The user must have a list of drugs that the system can recognize and can be analyzed.
Test Steps	1. The user inputs drugs into each input textbox. 2. The user clicks add medication as needed for the amount of drugs they want to compare. 3. User clicks analyze medications 4. System analyzes input and returns a table of conflicting 5. Button for saving the list is enabled 6. User clicks the save med list button
Expected Result	The system saves the med list to local memory
Postconditions	Med list is saved to local memory

Test Case ID	TC_2
Test Scenario	The User Loads a saved list from local memory and allows the user to analyze it
Preconditions	The User has accepted the disclaimer and the User has a saved list of drugs in local memory
Test Steps	1. The User clicks the “Load Med List Button”
Expected Result	The System loads the Users med list from local memory into the input boxes (adding boxes to the input if necessary)
Postconditions	The User can Analyze the newly imputed list by clicking the analyze button

Test Case ID	TC_3
Test Scenario	The User deletes a saved list from local memory
Preconditions	The user already accepted the disclaimer. There is a saved med list in local storage. The delete med list button is visible.
Test Steps	1. Open MediCode app 2. Accept disclaimer 3. Open DevtTools-> Application->Local storage to check for med list 4. Click delete Med List in the app 5. Check the My Med list section 6. Check local storage again
Expected Result	The saved Med list disappears from my med list area Local storage
Postconditions
